38 Unbalanced and/or Front-Loaded Tenders

The determination shall not take into consideration the qualifications of other firms such as the Tenderer's subsidiaries, parent entities, affiliates, subcontractors or any other firm(s) different from the Tenderer that submitted the Tender.

39.3 An affirmative determination shall be a prerequisite for award of the Contract to the Tenderer. A negative determination shall result in disqualification of the Tender, in which event the Procuring Entity shall proceed to the Tenderer who offers a substantially responsive Tender with the next lowest evaluated cost to make a similar determination of that Tenderer's qualifications to perform satisfactorily.

1. Technical Requirements

1.0 Background

Kenya Railways Corporation (KRC) is a state-owned corporation in Kenya that is responsible for the development, management and operation of the country's railway network. It plays a crucial role in the transportation sector, facilitating the movement of passengers and freight across Kenya. KRC is mandated to provide efficient, reliable, and affordable railway services to support national development and regional integration efforts.

Among KRC's main units include:

1. Operations Control Center - is responsible for overseeing and managing the day-to-day operations of train services and ensuring the smooth and safe operation of the railway network. The main workflows include Train Scheduling, crew management, Train Dispatching, Incident Management and Performance and Monitoring
2. GIS/Survey Department - plays a crucial role in collecting, mapping, managing, and analyzing geographic data related to railway infrastructure. It focuses on utilizing GIS technology and survey techniques to support decision-making, planning, and maintenance of the railway network and KRC's assets. The department's workflows include Data Collection, Data Management, Data Analysis, Network Planning and Design and Asset Management.
3. Finance and Real Estate - The Finance/Real Estate department oversees the management of residential properties, land parcels, and the collection of rental income.

The Corporation has implemented a GIS System premised on ArcGIS software. that is utilized by relevant geospatial professionals/officers in undertaking their core functions. The current ArcGIS software licenses have expired and therefore necessitate renewal of the licenses on the upgraded and current version of the software. The upgraded version will enable KR to achieve the following: -

- Upgrade of the current licenses from Standard to Advanced for KRC to have access to advanced spatial analysis tools, improved data management capabilities, and enhanced mapping and visualization features.
- Configure a centralized Enterprise Geodatabase to provide a unified, scalable repository for KRC's spatial and non-spatial data stemming from various departments.

- Design a proper data management workflow KRC can use to efficiently handle the entire lifecycle of data from collection to archiving.
- Integrate SAP with ArcGIS Enterprise to enable efficient management of building rent, leases, land acquisition and compensation processes. This will provide powerful tools for financial management, spatial analysis and data visualization.
- Receive training for the Surveying and GIS Technician teams on the new tools to be available from the upgraded licences.

Solution Architecture

The supplier should be able to provide a solution architecture to enable the client gain maximum value from investing in the technology

The expected solution architecture is as shown in the diagram below:-

Solution Components

The required solution components include the following:

Data Management

The survey department requires an efficient data management system to handle the extensive geospatial data related to rail infrastructure, land surveys and rail assets. KR requires utilization of Enterprise Geodatabases to provide KRC with a platform for storing, managing, analyzing, and sharing rail-related data.

With ArcGIS Enterprise, KR requires the service provider to create user accounts with appropriate roles and permissions, differentiating between administrators, editors, and viewers to control data access and editing rights. The service provider should ensure that data is organized and stored in a central repository, hosted on an RDBMS such as SQL

Server/PostgreSQL/Oracle.

To achieve best practices in data management, the service provider will need to create data schemas for each individual module to prepare for the data migration process. KR requires the service provider to develop workflows for importing data from various sources into the database. The service provider should implement versioned editing to allow multiple users to edit data simultaneously without conflicts.

KR requires the service provider to configure ArcGIS Field Maps to equip field workers and surveyors with a mobile solution to enable real-time data collection and updates. This option will enable field workers to work offline in areas without network coverage. To enable data sharing and collaboration, KR requires implementation of workflows to publish feature services, map services, and image services to ArcGIS Server and Portal for GIS for access via web and mobile applications.

SAP Integration

KR requires to implementation of an integration of SAP with ArcGIS Enterprise using database-to-database integration to enhance the finance department's management of building rent and leases, land acquisition, and compensation processes. This integration should leverage SAP's robust financial management capabilities and ArcGIS's advanced spatial capabilities to provide a comprehensive and efficient system for handling these complex processes.

The solution should ensure smooth data exchange between SAP and ArcGIS, leveraging existing investments in both systems. The service provider is required to configure direct database connections between SAP and ArcGIS-compatible databases (PostgreSQL, MSSQL Server). Implementation of Extract, Transform, Load (ETL) tools to handle data extraction from SAP, transformation, and loading into Enterprise geodatabases. The service provider should define data mapping to ensure consistency between SAP financial data and spatial data in ArcGIS.

The solution should be able to track lease agreements, payment schedules, and renewal dates. Map leased properties and visualized lease status, rental income and expiration dates will be monitored. Generation of financial reports and dashboards related to building rent all leased will be enabled. The solution should also track land parcels involved in the acquisition processes, including ownership, valuation, and compensation details. Management of compensation payments, monitoring of disbursements and generation of related financial reports will be achieved.

Real-time synchronization between SAP and ArcGIS should be implemented to ensure data consistency. There will be need for the creation of interactive dashboards to visualize financial metrics related to rent, leases, and land acquisition.

Required Training

The training required should cover the following areas:

- Introduction to GIS using ArcGIS (3 Days)
- ArcGIS Pro: Essential Workflows (5 Days)
- Field Data Collection and Management (3 Days)
- Managing Geospatial Data in ArcGIS (3 Days)

Except as provided in Sub-Clause 5.2, the Contract Price may only be increased above the amounts stated in Sub-Clause 6.2 if the Parties have agreed to additional payments in accordance with Sub-Clauses 2.4 and 6.3.

6.2 Contract Price

- a) The price payable is **set forth in the SCC**.
- b) Price may be payable in foreign currency, if so allowed in this document.

The percentage already worked out during tender evaluation is worked out as follows: $(\text{corrected tender price} - \text{tender price}) / \text{tender price} \times 100$.

6.4 Terms and Conditions of Payment

Payments will be made to the Service Provider according to the payment schedule **stated in the SCC. Unless otherwise stated in the SCC**, the advance payment (Advance for Mobilization, Materials and Supplies) shall be made against the provision by the Service Provider of a bank guarantee for the same amount, and shall be valid for the period **stated in the SCC**. If so provided, the amounts certified in each payment certificate, after deducting for Advance Payment, shall be adjusted by applying the respective price adjustment factor or to the payment amounts due in each currency. A separate formula of the type indicated below applies to each Contract currency:

$$P_c = A_c + B_c L_{mc} / L_{oc} + C_c I_{mc} / I_{oc}$$

Where:

P_c is the adjustment factor for the portion of the Contract Price payable in a specific currency "c".

A_c , B_c and C_c are coefficients specified in the **SCC**, representing: A_c the non-adjustable portion; B_c the adjustable portion relative to labor costs and C_c the adjustable portion for other inputs, of the Contract Price payable in that specific currency "c"; and

L_{mc} is the index prevailing at the first day of the month of the corresponding invoiced at and L_{oc} is the index prevailing 28 days before Tender opening for labor; both in the specific currency "c".

I_{mc} is the index prevailing at the first day of the month of the corresponding invoice date and I_{oc} is the index prevailing 28 days before Tender opening for other inputs payable; both in the specific currency "c".

If a price adjustment factor is applied to payments made in a currency other than the currency of the source of the index for a particular indexed input, a correction factor Z_o/Z_n will be applied to the respective component factor of p_n for the formula of the relevant currency. Z_o is the number of units of Kenya Shillings of the index, equivalent to one unit of the currency payment on the date of the base index, and Z_n is the corresponding number of such currency units on the date of the current index.

6.6.2 If the value of the index is changed after it has been used in a calculation, the calculation shall be corrected and an adjustment made in the next payment certificate. The index value shall be deemed to take account to all changes in cost due to fluctuations in costs.

The notice shall be given as soon as practicable, and not later than 28 days after the Contractor became aware, or should have become aware, of the event or circumstance.
- 8.1.2 If the Contractor fails to give notice of a claim within such period of 28 days, the Time for Completion shall not be extended, the Contractor shall not be entitled to additional payment, and the Procuring Entity shall be discharged from all liability in connection with the claim. Otherwise, the following provisions of this Sub-Clauses shall apply.
- 8.1.3 The Contractor shall also submit any other notices which are required by the Contract, and supporting particulars for the claim, all relevant to such event or circumstance.

receiving any notice under this Sub-Clause, monitor the record-keeping and /or instruct the Contractor to keep further contemporary records. The Contractor shall permit the Project Manager to inspect all these records, and shall (if instructed) submit copies to the Project Manager.

8.1.5 Within 42 days after the Contractor became aware (or should have become aware) of the event or circumstance giving rise to the claim, or within such other period as may be proposed by the Contractor and approved by the Project Manager, the Contractor shall send to the Project Manager a fully detailed claim which includes full supporting particulars of the basis of the claim and of the extension of time and /or additional payment claimed. If the event or circumstance giving rise to the claim has a continuing effect:

8.1.5.1 This fully detailed claim shall be considered as interim;

- a) The Contractor shall send further interim claims at monthly intervals, giving the accumulated delay and /or amount claimed, and such further particulars as the Project Manager may reasonably require; and
- b) The Contractor shall send a final claim within 28 days after the end of the effects resulting from the event or circumstance, or within such other period as may be proposed by the Contractor and approved by the Project Manager.

8.1.6 Within 42 days after receiving a claim or any further particulars supporting a previous claim, or within such other period as may be proposed by the Project Manager and approved by the Contractor, the Project Manager shall respond with approval, or with disapproval and detailed comments. He may also request any necessary further particulars, but shall nevertheless give his response on the principles of the claim within the above defined time period.

8.1.8 Each Payment Certificate shall include such additional payment for any claim as has been reasonably substantiated as due under the relevant provision of the Contract. Unless and until the particulars supplied are sufficient to substantiate the whole of the claim, the Contractor shall only be entitled to payment for such part of the claim as he has been able to substantiate.

8.1.10 The requirements of this Sub-Clause are in addition to those of any other Sub-Clause which may apply to a claim. If the Contractor fails to comply with this or another Sub-Clause in relation to any claim, any extension of time and/or additional payment shall take account of the extent (if any) to which the failure has prevented or prejudiced proper investigation of the claim, unless the claim is excluded under the second paragraph of this Sub-Clause.

8.2 Matters that may be referred to arbitration

8.2.1 Notwithstanding anything stated herein the following matters may be referred to arbitration before the practical completion of the Services or abandonment of the Services or termination of the Contract by either party:

8.4 Arbitration

8.4.1 Any claim or dispute between the Parties arising out of or in connection with the Contract not settled amicably in accordance with Sub-Clause 8.3 shall be finally settled by arbitration. Arbitration shall be conducted in accordance with the Arbitration Laws of Kenya.

8.4.2 The arbitrators shall have full power to open up, review and revise any certificate, determination, instruction, opinion or valuation of the Project Manager, relevant to the dispute. Nothing shall disqualify representatives of the Parties and the Project Manager from being called as a witness and giving evidence before the arbitrators on any matter whatsoever relevant to the dispute.

8.4.3 Neither Party shall be limited in the proceedings before the arbitrators to the evidence, or to the reasons for dissatisfaction given in its Notice of Dissatisfaction.

8.4.4 Arbitration may be commenced prior to or after completion of the services. The obligations of the Parties, and the Project Manager shall not be altered by reason of any arbitration being conducted during the progress of the services.

8.5.2 The institution written to first by the aggrieved party shall take precedence over all other institutions.

8.5.3 The arbitration may be on the construction of this Contract on any matter or thing of what so ever nature arising there under or in connection there with, including any matter or thing left by this Contract to the discretion of the Project Manager, or the withholding by the Project Manager of any certificate to which the Contractor may claim to be entitled to or the measurement and valuation referred to in clause 23.0 of these conditions, or the rights and liabilities of the parties subsequent to the termination of Contract.

8.5.4 Provided that no arbitration proceedings shall be commenced on any claim or dispute where notice of a claim or dispute has not been given by the applying party within ninety days of the occurrence or discovery of the matter or issue giving rise to the dispute.

8.5.5 Notwithstanding the issue of a notice as stated above, the arbitration of such a claim or dispute shall not commence unless an attempt has in the first instance been made by the parties to settle such claim or dispute amicably with or without the assistance of third parties. Proof of such attempt shall be required.

8.5.6 The Arbitrator shall, without prejudice to the generality of his powers, have powers to direct such measurements, computations, tests or valuations as may in his opinion be desirable in order to determine the rights of the parties and assess and award any sums which ought to have been the subject of or included in any certificate.

8.5.8 The award of such Arbitrator shall be final and binding upon the parties.

8.6 Failure to Comply with Arbitrator's Decision
